Five plants in five areas

...ed at a workshop titled 'Developing Bangladesh National List of Plants and Developing Management Strategy of Alien Species of Plants in Selected Protected Areas' organized by the forest department at its headquarters in the capital. Environment, forest and climate change minister Md Shahab Uddin was present at the programme as the chief guest. He said that five strategic management plans had been formulated for proper management of the identified alien invasive plant species. "The strategies will play an important role in conserving national forests and forest resources and achieving our sustainable development goals," said the minister. He said that all these invasive plants could be controlled by preventing marketing and trade of species that had a negative impact on environment, economy and society, and by eliminating them from the ecosystem and preventing their spread.
